*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

680-684 Hayes Street is located on a 25' x 72' lot on the north side of Hayes Street, between Buchanan and Laguna Streets. Built in 1885, 680-684 Hayes Street is a 3-story, wood frame, three-unit, multiple family residence designed in a modified Classical Revival style. The rectangular-plan building, clad in stucco, is capped by a gable roof. The primary façade faces south, is 2 bays wide, and is largely obscured by a street tree. A narrow concrete site wall and an ornamental metal fence enclose the lot frontage. The ground floor features a terrazzo stair with concrete side walls in the left bay, and a pair of double-hung, wood windows in the right bay. The terrazzo stairs provide access to the recessed entry porch in the left bay of the first floor. The porch features an arched opening and two single-light glazed, wood-panel doors with molded surrounds and transoms. The right bay contains a two-story semi-hexagonal bay window with double-hung, wood sash with simple molded surrounds. A single window with double-hung vinyl sash is set above the entry porch in the left bay of the second story. The primary façade terminates in a simple cornice with brackets capped by an pent roof clad in asphalt shingles. A pediment is set above the left bay. The building appears to be in good condition.
