*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

100 Gough St. is located on a 28' x 120' through lot on the east side of Gough Street running from Lily to Page Streets. Built in ca. 1915, 100 Gough Street is a 4-story, wood frame, multiple family and commercial building designed in the Classical Revival style. The rectangular-plan building, clad in brick on the first story and stucco on the upper stories is capped by a flat roof. The foundation is not visible from the street. The primary façade faces west and is 10 bays wide. The building has secondary elevations on Lily facing north and Page Street facing south measuring 2 bays wide. The first story of the façade features modern storefronts in the left 5 bays, an entrance to the upper story apartments in the 6th bay, and a restaurant in the right 4 bays. Both storefronts continue on the north and south elevations. The storefronts have metal and vinyl-frame plate glass windows and glazed wood doors. The Lily Street (north) elevation also has a bay entrance fitted with double-leaf metal doors. The entrance to the apartments is recessed and fitted with double-leaf, glazed wood doors. The recess has a bracketed entablature cap with coffered cornice hidden by an awning. The upper stories of the façade are characterized by a series of alternating flush windows and rectilinear bay windows in the middle bays and 5-sided bay windows at the corners. The secondary elevations have an additional rectilinear bay window. All bay windows rest on brackets, have wood, double-hung sash, and end with dentil cornices at the fourth-story level. All elevations terminate in a parapet stepped above each rectilinear bay window. The building appears to be in good condition.
