*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)
333 Haight Street is located on a 35' x 120' lot on the south side of Haight Street, between Buchanan and Webster Streets. Built in 1961, 333 Haight Street is a two-story, wood frame, four-unit multiple-family residence, designed in a modern style. The rectangular-plan building, clad in vertical lap wood siding, sits on a reinforced concrete perimeter foundation and is capped by a flat roof. The primary façade faces north and is three bays wide. The only fenestration on the primary façade is a two-story vetical strip of glass-block windows located along the left edge of the building. The secondary façade facing west and features fenestration composed of aluminum-sash slider windows. The primary facade is articulated by a second-story horizontal mass extending down the length of the building. The main entrance is located on the secondary façade behind a metal fence. This building extends the depth of the lot and has garage access at the back (entrance on Laussat Street). The primary facade terminates in a simple roofline. The building appears to be in good condition, despite the uneven paint surface on the façade. It contributes to the potential Hayes Valley Residential Historic District update (see DPR 523 D form)
