*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

501 Oak St. is located on an 82' x 60' corner lot on the south side of Oak Street, between Buchanan and Webster Streets. Built in 1961, 501 Oak St is a 3-story, wood frame apartment building designed in a modern style. The L-plan building, clad in smooth stucco, sits on a reinforced concrete foundation and is capped by a flat roof. The primary façade faces north toward Oak Street, and a secondary elevation faces east toward Buchanan Street. The primary façade is 6 bays wide. The left three bays are set flush with the lot frontage, while the right three bays are recessed. The first floor features a recessed entry porch in the third bay enclosed with metal fencing. The building has a single, glazed aluminum-frame door flanked by fixed metal-frame windows with textured, brown glass. The fourth bay contains a single fixed window with security bars. The second story contains an area of wood infill in the first bay with vinyl sliding sash. The second, third, fifth, and sixth bays contain three-part, metal-frame picture windows with side sliding sash. The fourth bay contains metal-frame, sliding glass doors accessing a fire escape. The third story has identical three-part picture windows in the first, second, fifth, and sixth bays and a sliding sash window in the third bay. The fourth bay has sliding glass doors. The Buchanan Street elevation has three garages on the first story and an asymmetrical arrangement of three-part picture windows of varying sizes and metal sliding sash. Both elevations terminate in a plain, overhanging eave. The building appears to be in good condition.
