*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

340 Page St. is located on a 55' x 120' through lot on the north side of Page Street, between Buchanan and Laguna Streets. Built in 1937, 340 Page St is a 4-story, brick masonry, 20-unit multiple family residence, designed in the Colonial Revival style. The "I" plan building, clad in brick and wood horizontal drop siding, is capped by a flat roof. The foundation is not visible. The primary façade faces south and is 5 bays wide. The left bay of the first floor features a secondary entrance with a paneled wood door and a recessed primary entrance with brick steps and metal door hood. A metal gate leads to a glazed wood door with sidelights and cast iron ornament. The second bay contains an oval window, while the fourth and fifth bays contain garage entrances with overhead garage doors. The second story features paired, 6-over-6 double-hung, wood sash windows in the second, fourth, and fifth bays, and an oval window in the center bay. The third and fourth stories are characterized by box bay windows in the second and fourth bays, and paired windows in the first and fifth bays. The sash configurations are identical to those on the second story. The center bays contain oval windows. The bay windows terminate in front-facing gable ends with circular moldings in the middle. The primary facade terminates in a false parapet with an asphalt shingle pent roof. The building appears to be in good condition, and was under construction during the time of the survey.
