*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

92-98 Webster St. is located on a 3,670 square-foot lot on the east side of Webster Street between Waller and Hermann Streets. Built circa 1880, 92-98 Webster St. is a three-story, wood-frame, multiple-family dwelling designed in the Stick/Eastlake style. The square-plan building, clad in stucco, is capped by a gable roof concealed behind a false parapet. The primary façade faces west along Webster St. and is four bays wide. At the first floor level, the end bays contain integrated garages with wood doors. The central two bays feature straight flights of terrazzo steps with metal handrails. The end bays at the second and third floor levels feature squared bay windows containing pairs of double-hung, vinyl windows. The central bays contain recessed entryways enclosing glazed, wooden doors. Above each entry on the third floor are individual double-hung, vinyl windows. The secondary façade along Waller Street is four bays wide and features a largely symmetrical fenestration pattern. Both façades terminate with a paneled frieze and a bracketed cornice. The building appears to be in good condition but most of its ornamentation has been removed. It is stylistically similar and related to 88-90 Webster St.
