This schematic concept and previous versions of the rendered schematic plan (3/10/2017) have not yet been fully reviewed all the divisions of the Recreation and Park Department. The Recreation and Park Department will start a park detail design process later this year, building on the work that we’ve achieved through the Public Realm Plan. The typical Recreation and Park Department design process will make decisions regarding final material choices, alignment of paths, width of paths, plant selection, and other aspects. This schematic plan shown here may change through the typical Recreation and Park Department process. However, this schematic represents what we’ve heard as the community feedback for preferred programs and amenities, size and rough allocation of functional program areas; and will inform the next phase of park design.
