WHAT IS GREEN CONNECTIONS?

Green Connections will increase access to parks, open space and the waterfront, by re-envisioning City streets and paths as 'green connectors'. This project builds on current efforts to create sustainable corridors that enhance mobility, green neighborhood streets, and improve pedestrian and bicycle access to community amenities and recreational opportunities.

In the first year of the project, the focus will be to map a citywide network. The second year will build on this framework to design a green connection in the following six neighborhoods: Bayview-Hunters Point, Chinatown, Potrero Hill, Tenderloin, Visitacion Valley, and Western Addition.
