

GUERRERO PARK

Share your vision for Guerrero Park!

Sunday, January 28

10am-2pm (drop by any time)

618 San Jose Avenue, San Francisco, CA 94110, USA
(Intersection of 28th St., Guerrero St., & San Jose Ave.)

Guerrero Park was originally installed in 2009 as a temporary traffic calming effort at the intersection of Guerrero St and San Jose Ave. As part of their Development Agreement with the City, California Pacific Medical Center (CPMC) has committed to installing permanent improvements and establish the site as a southern gateway to the Mission Neighborhood.

CPMC, design firm **HOK**, and **San Francisco Planning** are working together with the community to design and implement an open space for residents and visitors to enjoy. At the first workshop in November 2017, suggestions included a safety buffer along Guerrero, space for movie screenings or farmers' market, incorporating a focal art piece, and children's play equipment near San Jose Avenue.

Join us on Sunday, January 28 for a public workshop to discuss how the park is currently used, as well as activities to help choose desired uses for the future improvements. Children welcome. Snacks will be served.
