SUMMARY OF ESPRIT PARK - SPECIFIC OUTREACH EFFORTS

MMARY OF FINDINGS: STAKEHOLDER FOCUS GROUP MEETINGS http://default.sfplanning.org/Citywide/Dogpatch_Ctrl-Waterfront/EPFG_Meeting_Notes_All_2017.01.20.pdf

JSES & USERS

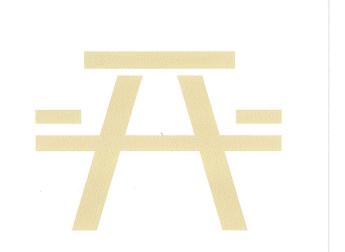

We with Though the Park is officially an onleash Park facility, it is used informally as an off-leash facility by many dog owners. Dog use peaks in the early morning (before working hours) and evening hours (after work hours).

the park stould continue

dog friendly environment

to offer off leash

The Park is not always regarded as a viable location for children's play by many local parents with young children and organizations serving young children, due to concerns about biting, collisions; sanitation in grassy areas where dogs and children mix.

'Passive' uses such as lunching, wetter picnicking, reading, and peoplewatching are less-frequent uses; though most stakeholders diming expressed desire to provide more facilities for these types of uses.

USES & USERS

DESIGN PRINCIPLES

The 'design concept' established at the Park's first creation by Doug and Susie Tompkins of the Esprit Corporation, with the Landscape Architect Drew Detsch - should be honored and retained as updated

Doug Tompkins

Shade trees Important

> Maintain a feeling of 'respite' and 'refuge' buffered from the urban environment with a 'naturalistic' planting scheme evoking a 'forest and meadow' in the City. Curvilinear, organic design vocabulary evoking the picturesque English 2 Not school of garden design.
> Close of abit more from

Create naturalistic playscape environments that blend into the forest setting, providing areas for environments that blend into the forest setting, providing area for children to climb, play, and explore nature.

DESIGN PRINCIPLES

MAINTENANCE

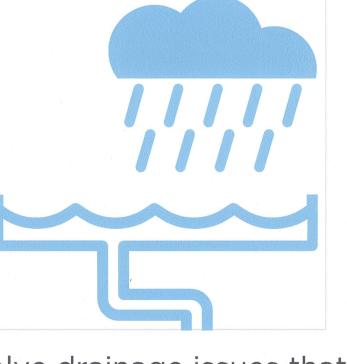

Though the City conducts fairly frequent maintenance at the site, stakeholders expressed a desire for investment in higher - quality maintenance regime.

Agreed!

CONSISTENT

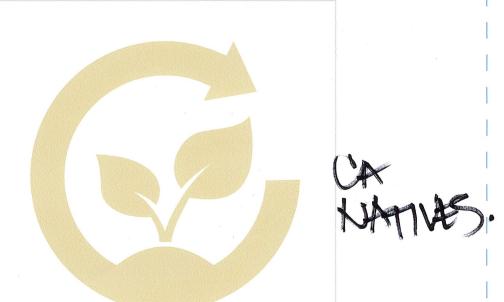

WATER

Resolve drainage issues that result in sodden grass and impassable pathways.

Nothing should be done until this huge problem is addressed

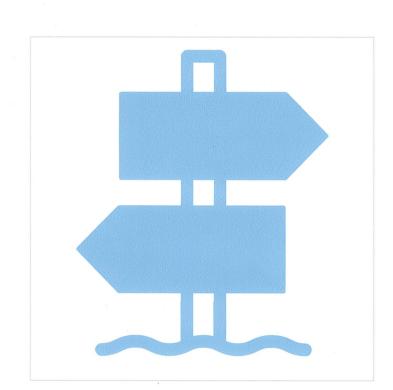

PLANTS- BASELINE - 100% OF THE QUIZE PARK SHOULD BE USEABLE.

Develop a planting plan for the urban forest and understory vegetation, selecting species that are well-adapted to the local environment and provide habitat value for indigenous animal spe-

MAINTENANCE

CIRCULATION

Provide entrances at all four corners of the Park. Enhance signage.

YES- FORMALIZE.

Establish clearer and easier to navigate paths on the 19th Street and 20th Street edges of the

SIDEWALKS TRAW PEDS INTO PAPEL.

Establish marked crosswalks at all four corners of the Park

(FB)!

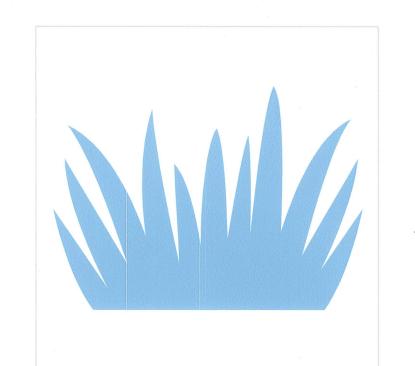

CIRCULATION

SAFETY

Design perimeter plantings to allow for clear sightlines, but also create a sense of enclosure or buffer from the surrounding urban environment.

+ fences/barriers for safety of puppies & Children

Design with minimal hardscape features; emphasizing the use of trees and plantings to establish edges that discourage dogs or children from running out into the street.

Explore appropriate nighttime lighting solutions for the park.
