## Green Connections

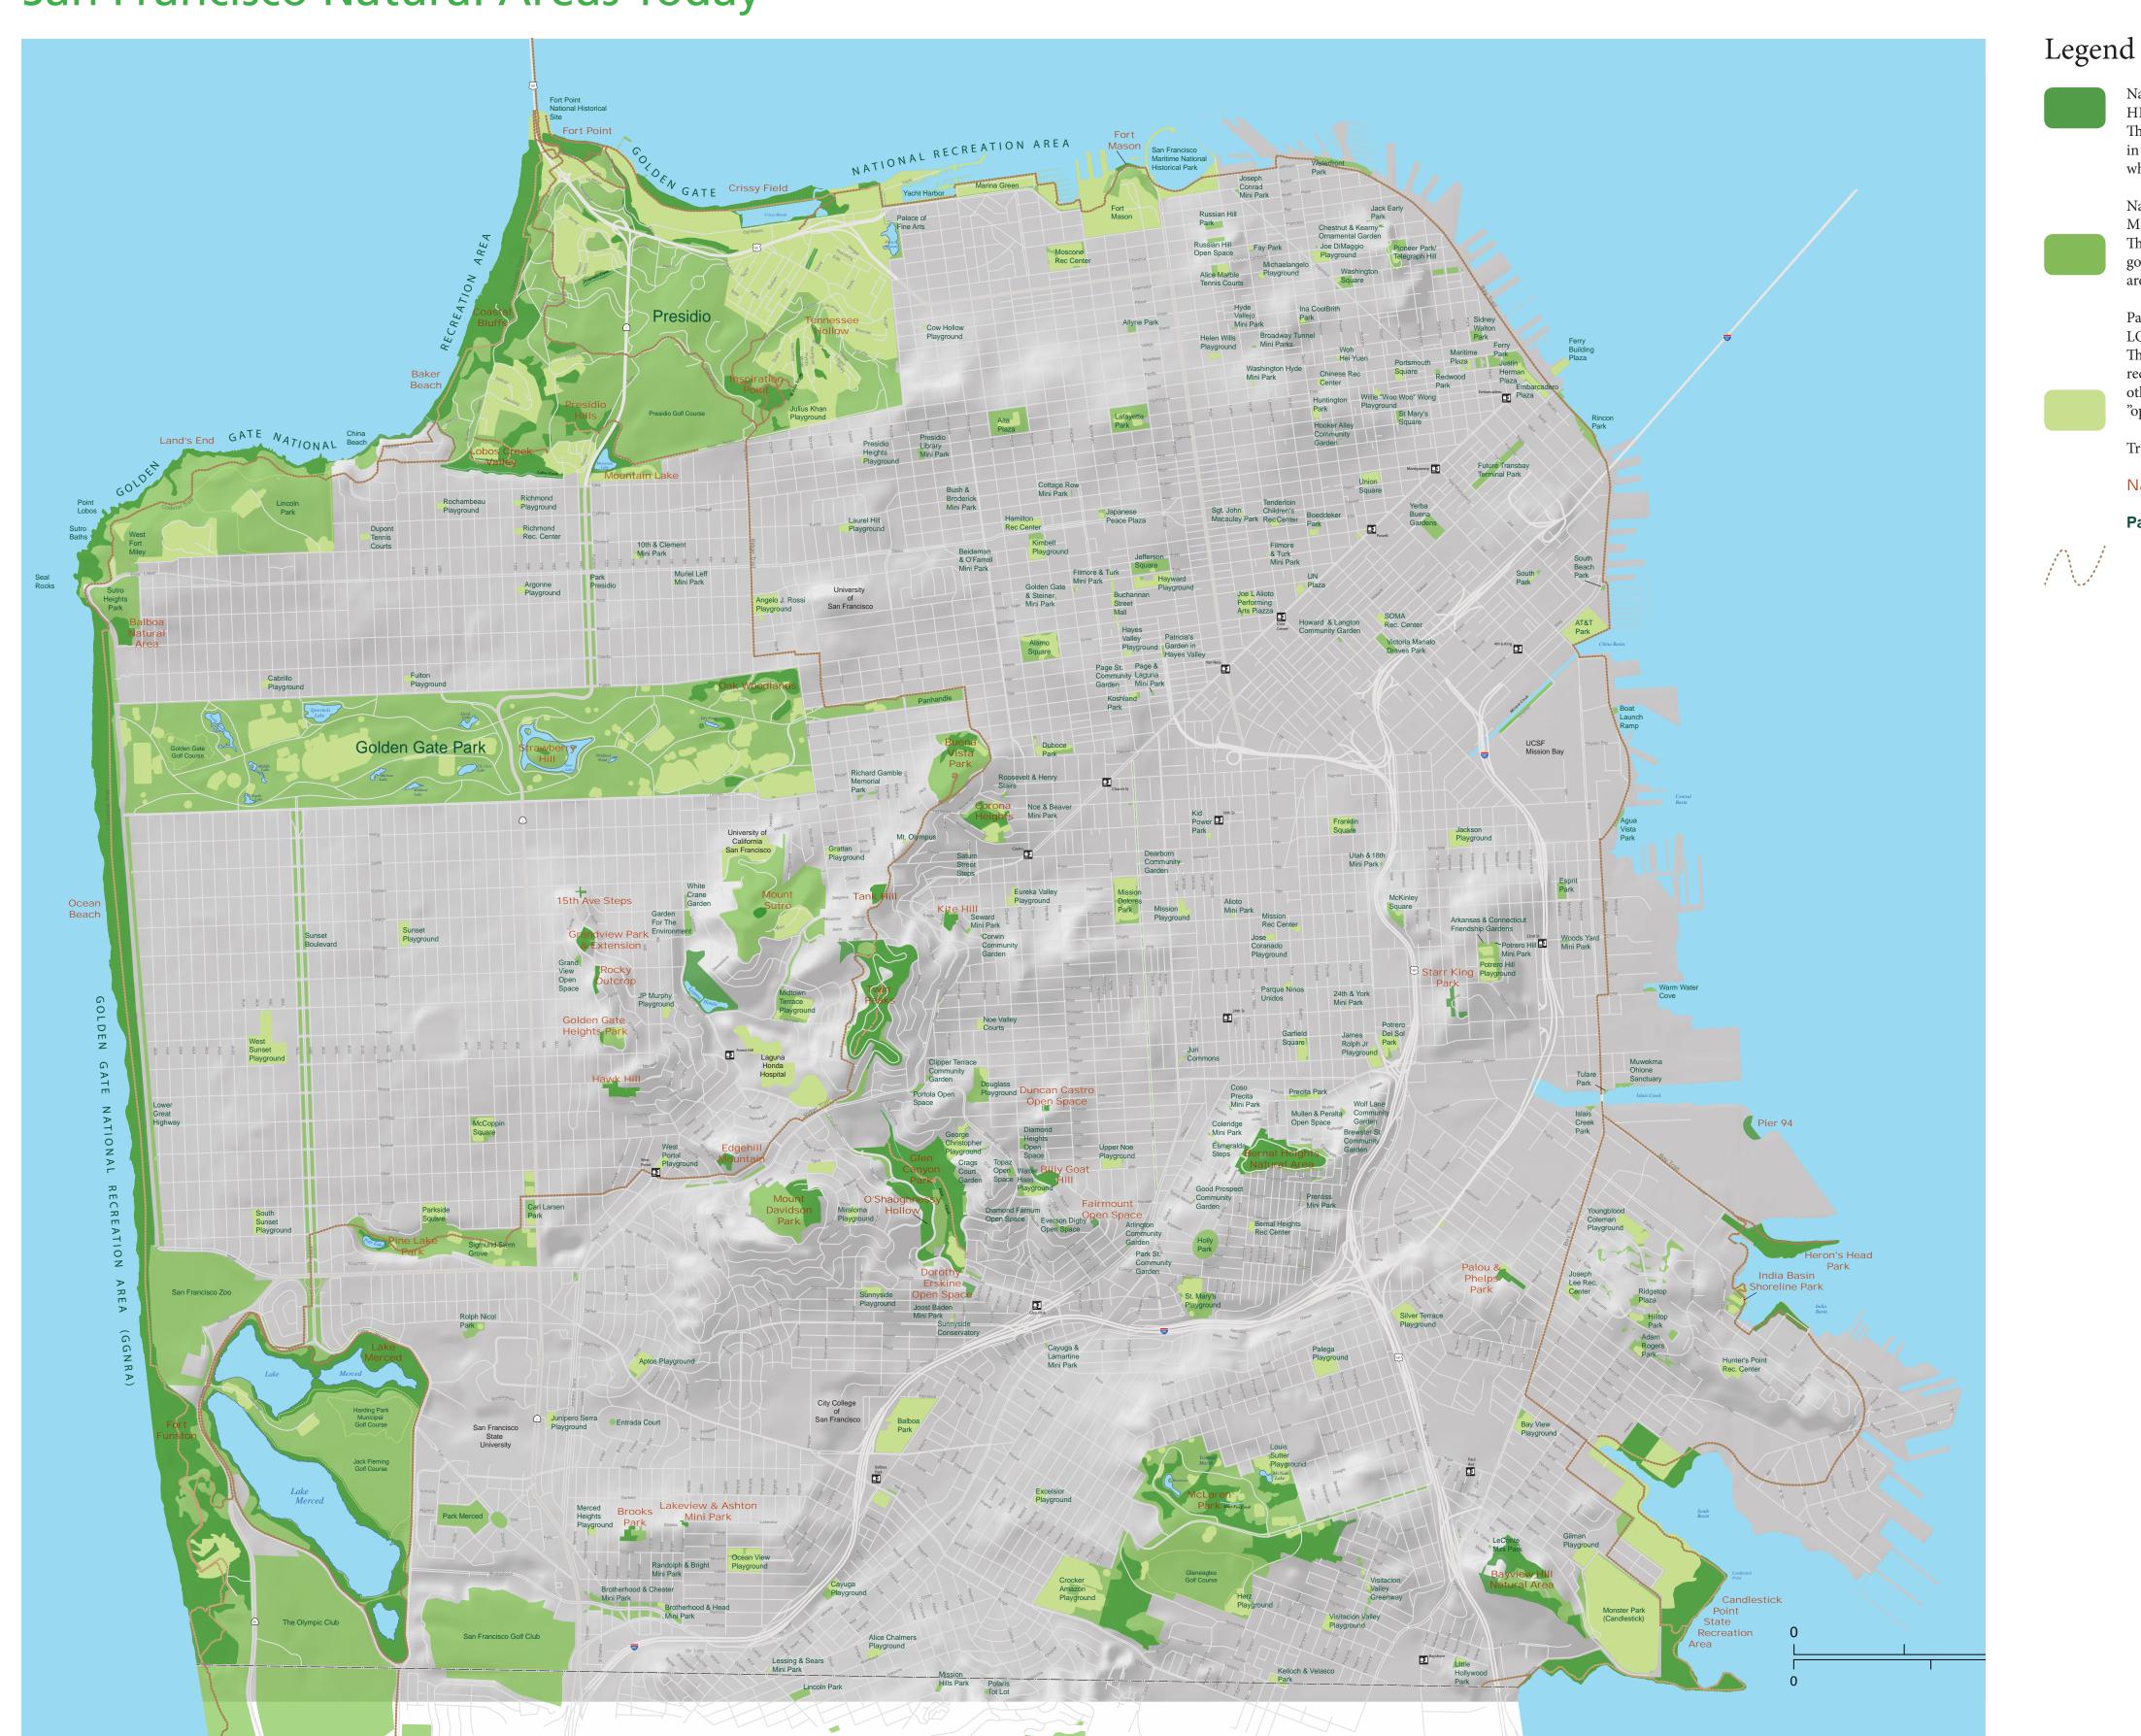

## Historic Landscapes/Natural Areas: Enhancing Habitat

## San Francisco Pre-European Contact

## San Francisco Natural Areas Today

Adapted from the San Francisco Wild in the City map created in 1992 by Nancy Morila

HIGH BIOLOGICAL DIVERSITY

Naturalistic

These places harbor the city's native habitats

in restored areas and original landscapes, which are managed for biological diversity.

MEDIUM BIOLOGICAL DIVERSITY
These lands include non-native urban forest,

Park Facilities & Other Sites

LOW BIOLOGICAL DIVERSITY
These areas include athletic fields, lawns,

golf courses and other open spaces. These areas provide habitat for some native wildlife.

recreation centers, playgrounds, stadiums and other hardscapes that may not be classified as
