PROJECT DESCRIPTION

The proposal is for new construction of a two-story detached structure at the front of the lot. The structure would extend to the front property line, be set back seven-feet from the south side property line, and measure 29-feet in depth. The ground floor of the structure would contain a one-car garage and the second floor would contain 328 square-feet of habitable area, including a half bath that is accessory to the dwelling unit.

PER SECTION 132 OF THE PLANNING CODE the subject property is required to maintain a front setback of approximately 11'-8". The proposed structure would extend to the front property line, encroaching approximately 11'-8" feet into the required front setback; therefore, the project requires a variance from the front setback requirement of the Planning Code.
