PROJECT DESCRIPTION

The project proposes a side horizontal addition within the footprint of the existing two-story rear structure containing one dwelling unit above a garage. The project also proposes reconstruction of an existing one-story staircase at the northeast corner of the rear façade of the building at the front of the lot.

Planning Code Section 134 requires a rear yard equal to 45-percent of the total lot depth. The required rear yard for the subject lot is 45 feet. The existing two-story structure occupies the last 20 feet of the required rear yard depth for the full width of the lot (45 feet wide); therefore a rear yard variance is required.
