

# THE NEIGHBORHOOD

## WHAT WE HEARD: NEIGHBORHOOD VISION

### TRANSPORTATION OPTIONS

- The street network should be safe, comfortable, and efficient for a variety of transportation options: walking, transit, bike, car, taxi.
- Streets should feel safe for pedestrians to cross and comfortable to walk along, especially at night.
- Accessing the area's many transit options should be clear and comfortable.
- Traffic conflicts between all users should be minimized.

### LOCAL NEIGHBORHOOD

The neighborhood's streets should be a place that both residents and tourists can enjoy.

### IDENTITY

Haight Ashbury is a distinct neighborhood with a unique character. Its culture – both past and present – should be celebrated.

### WELL-MAINTAINED

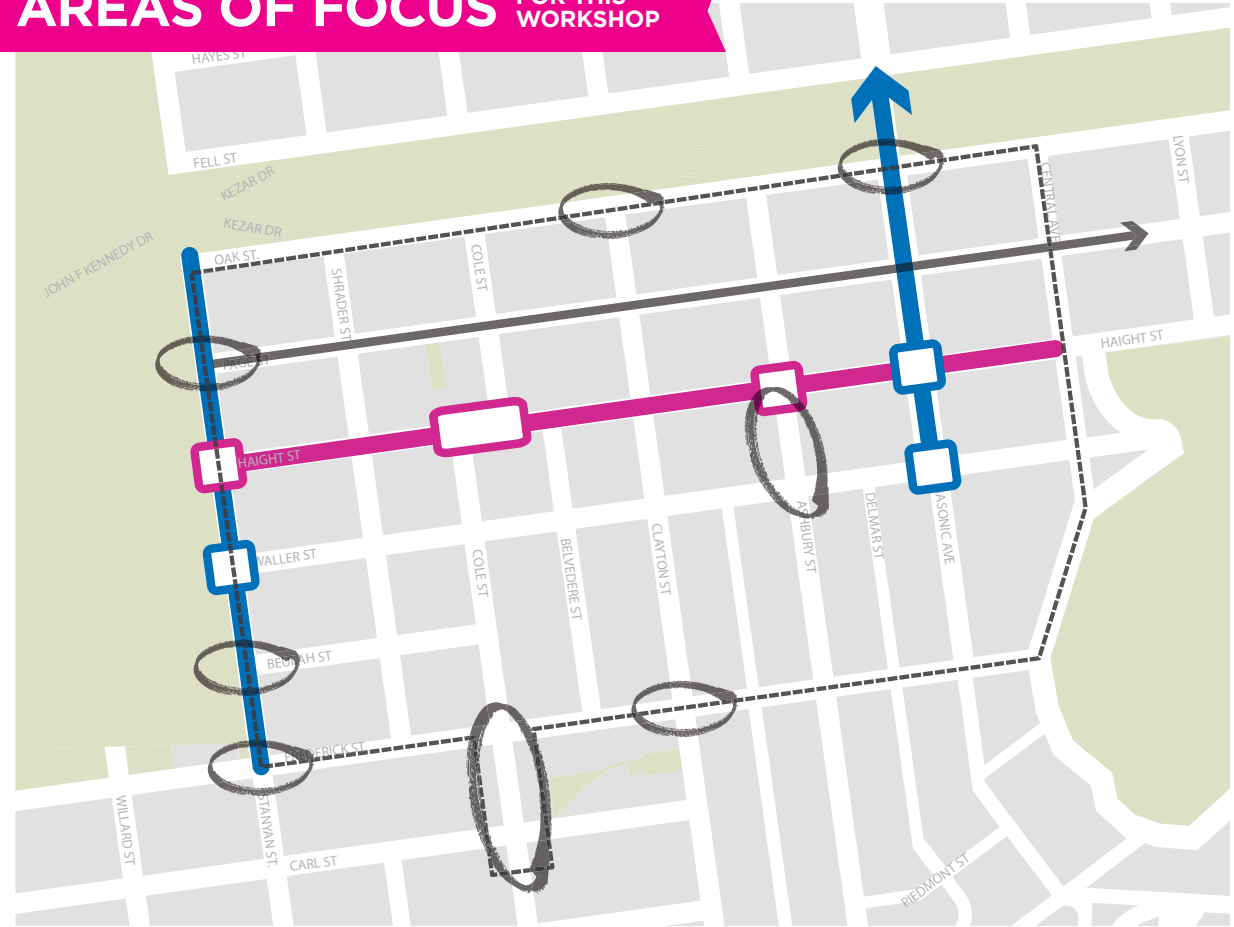

Any improvements should have a maintenance plan to ensure proper upkeep.

### GREEN

Wherever possible, gaps in greenery should be filled.

## AREAS OF FOCUS FOR THIS WORKSHOP

- █ Haight Street: Focus on Muni Improvements; Character + Identity
- █ Stryan Street and Masonic Ave: Focus on Traffic Calming; Pedestrian Safety
- Focus areas/intersections to be covered at future community meetings

## PROJECT TIMELINE & OUTREACH

The Haight Ashbury Public Realm Plan is intended to be a long-term vision for the neighborhood's streets and sidewalks. After the planning process is complete, implementation of the Plan's projects will be spread out over the course of many years. We hope to also capitalize on the MTA transit improvements that will be implemented in the near term.
